Re: CAMP LEJEUNE WATER LITIGATION

**I. Background and Qualifications**

I am a tenured Professor and Chair of the Community, Environment & Policy Department at the University of Arizona's Zuckerman College of Public Health and Director of the Environment, Exposure Science and Risk Assessment Center (ESRAC). I received my Bachelor of Science in Microbiology from the University of Arizona in 1989, my Master of Science in Public Health from the University of South Florida in 1992, and my PhD in Environmental Sciences from the University of Arizona in 1995. While pursuing my doctoral degree at the University of Arizona I worked as a research fellow in the Department of Soil and Water Science at the College of Agriculture. Upon obtaining my PhD I became a postdoctoral fellow and teaching assistant. I then progressed through various positions, ultimately becoming a tenured Associate Professor in 2012. From 2018 to the present, I have served as the Chair of the Department of Community, Environment and Policy in the College of Public Health. I obtained the title of full Professor at that time, and from 2021-2022 I was appointed the Interim Associate Dean for Research for the College of Public Health. In 2013 I co-founded, and have since served as the director of the University of Arizona's Environment, Exposure Science and Risk Assessment Center ([www.esrac.arizona.edu](http://www.esrac.arizona.edu)), a consortium of academic, government, and industry professionals working to advance exposure sciences and human health risk assessment research methods and outreach. Since 2021, I have also been the director of the US Department of Health and Human Services- funded Western Region Public Health Training Center ([www.wrphtc.arizona.edu](http://www.wrphtc.arizona.edu)), a technical assistance and training center for the Region 9 (Arizona, California, Nevada, Hawaii, and the US Pacific Islands) public health workforce.

With over 36 years of experience in environmental health sciences, I specialize in water quality, human health risk assessment, exposure science, and environmental hazards. My research and expertise center on quantifying human health risks associated with microbial and chemical contaminants in water systems, including drinking water, wastewater, and recreational waters. I have developed risk assessment models, rapid contaminant detection technologies, and public health interventions that inform regulatory policies and industry best practices. My work has been funded by leading agencies such as the Centers for Disease Control and Prevention (CDC), U.S. Environmental Protection Agency (USEPA), National Science Foundation (NSF), and Water Quality Research Foundation.

As an internationally recognized expert, I have served as a scientific advisor for regulatory agencies, industry groups, and public health organizations, offering expertise on waterborne disease transmission, microbial risk assessment, water reuse safety, and emerging contaminants. I have contributed to policy development and regulatory compliance evaluations, including assessing health impacts from water contamination events and providing expert input on drinking water treatment standards.

My leadership in scientific advisory panels, government task forces, and industry working groups ensures that I remain at the forefront of emerging issues in water quality and risk assessment methodologies. My quantitative microbial risk assessment (QMRA) models have been applied to evaluating issues related to water safety, exposure pathways, and health risk mitigation strategies. I have received several honors and awards that are set out in my *curriculum vitae* that is being provided with this report. I have remained active in local, state, national, and international outreach in media presentations and publications.

My publications in scholarly books and textbooks, as well as in refereed, peer-reviewed journals are likewise documented in my *curriculum vitae*. Included in my publications and presentations are topics that touch upon the issues in the present case, including, for example, quantification of exposure, assessing levels of contamination, estimating exposure from historical data, and environmental contamination. With a track record of publishing over 430 peer-reviewed articles, book chapters, and technical reports, and giving over 138 invited and 97 submitted presentations, since 2006. I provide scientific, data-driven assessments that support the evaluation of waterborne contamination, exposure risks, quantitative risk assessment, and environmental health impacts. A list of my funded research is included in my *curriculum vitae* as well.

## **II. Scope of Assignment**

I have been asked to write a report reconstructing potential water ingestion models for Marines and civilians who worked and/or lived at Marine Corps base Camp Lejeune during the period of water contamination between 1953 and 1987. I performed this reconstruction based upon available data, historical records, water modeling, and evidence of required water consumption in various Field Manuals from the military in effect during the operative years.

## **III. Materials Reviewed**

In preparing my calculations attached to this report I reviewed and considered the following material:

- ATSDR, 2023 Exposure Dose Guidance for Water Ingestion
- ATSDR, 2017 ATSDR Assessment of the Evidence for the Drinking Water Contaminants at Camp Lejeune and Specific Cancers and Other Diseases
- ATSDR, 2017a Public Health Assessment
- Maslia et al., 2016 Reconstructing Historical VOC Concentrations in Drinking Water for Epidemiological Studies at a U.S. Military Base: Summary of Results

- Maslia et al., 2013 Chapter A Summary and Findings; Appendices A2, A7, A8 Reconstructed monthly mean concentrations
- Expert Report of Morris Maslia of October 25, 2024
- Depositions of each trial Plaintiff for whom a report is provided
- Official U.S. Military Field Manuals, 1957, 1970, 1980, 1982 and included water consumption guidelines
- Select military records of Plaintiffs from Marine Corps Base Camp Lejeune documenting beginning and ending dates stationed, working or residing at Camp Lejeune
- USEPA, 2011 Exposure Factors Handbook
- USEPA, webpage last updated January 31, 2025: Exposure Assessment Tools by Approaches- Indirect Estimation (Scenario Evaluation) <https://www.epa.gov/expobox/exposure-assessment-tools-approaches-indirect-estimation-scenario-evaluation#factors>
- Xu et al., 2016 A 5-Year Longitudinal Analysis of Modifiable Predictors for Outdoor Play and Screen-Time of 2- to 5-Year-Olds
- Huhmann et al., 2021 A Mass-Balance Model to Assess Arsenic Exposure from Multiple Wells in Bangladesh
- Deposition of Frank Bove of October 17-18, 2024

#### **IV. Methodology**

In attempting to reconstruct historical events, and particularly how much water was consumed by a Marine or a civilian in the 1950s to the 1980s, in my experience and in my profession I must resort to reconstructing models using the best-known and available data that exist. In the case of Marines and civilians who lived and worked on Marine Corps base Camp Lejeune, I utilize estimates provided by the Administration for Toxic Substances and Disease Registry (ATSDR), the scientific literature, Marine Corps records, the testimony of the Marine or civilian impacted, and recommendations for forecasting consumption between at-home, and at-work activities.

When attempting to model consumption for Marines on Marine Corps base Camp Lejeune, it is first important to understand when Marines were stationed at Camp Lejeune, whether they lived on or off base, and for what months they were on base. I consulted historical documents, including official military personnel records such as DD-214s, and reviewed deposition testimony regarding their time on base and their water consumption. These sources help recreate the timeline spent on base and identify any periods when a Marine was absent from Camp Lejeune. Due to the nature of a Marine's work tasks or possible deployments, it is possible for a Marine to be stationed

at Camp Lejeune but absent from the base for days, weeks, or months. Examples of these absences from the base could be due to deployments, extended training off base, or leave. I made every effort to account for such time away from Camp Lejeune when totaling days of exposure per month and in the aggregate.

In several cases there were Marines or civilians that worked on Marine Corps base Camp Lejeune, but who lived off base for part or all of their time while stationed or employed at Camp Lejeune. For such individuals, it is necessary to appropriately account for part of their water consumption/exposure time to be attributed to their off-base residence and part to their work time on base. As part of my methodology, I followed USEPA recommendations for an 8-hour occupational exposure day and a 16-hour residence exposure day, attributing 33% of consumption levels at their employment and 67% at their residence. The USEPA guidance on this division is based upon the assumption that 2/3 of a routine activity workday is spent at a person's residence, while 1/3 is spent at work (ATSDR, 2023). Given that Marines have testified that they spend longer days at work when participating in physical training (PT) and/or formal military training in the field (from a few to several days a month) proportionate estimates were modified. On days attributed to more intense PT or field training, compared to routine work activities (for example, desk work, equipment maintenance, or similar) I reversed this assumption and attributed 67% of the day's consumption at work and 33% of the day's consumption at home for those specifically identified events. I attribute 67% of PT and field training days to on-base consumption for two primary reasons: first, PT and field training days were longer and more physically taxing, requiring or inspiring greater consumption of water to maintain proper hydration; and second, many Marines testified to field training often requiring overnight stays in the field. Allowing only 67% of consumption for PT days for Marines living off-base is the most conservative way of accounting for increased consumption on base on these days. For those days attributed to overnight field training, I counted no at-home water consumption, resulting in a 100% consumption proportion.

Once the total number of days on Marine Corps base Camp Lejeune can be determined, and properly categorized as routine or PT/field activity days, the levels of the known contaminants in the water need to be understood. The ATSDR has provided monthly modeled levels for TCE, PCE, vinyl chloride, and benzene on a  $\mu\text{g/L-month}$  basis. I have used the ATSDR's peer-reviewed values for each applicable month, and corresponding volatile organic compounds (VOCs) and modeled projections in my exposure analysis to calculate cumulative exposures.<sup>1</sup> The calculation of days on base, separated on a month-by-month basis, exposure location, and VOC by average  $\mu\text{g/L-month}$ , as projected by ATSDR, are set out in the collection of tables produced for each individual plaintiff with this report.

Next, produced with this report is a series of exposure assessment charts. "Chart 1: Days on base and cumulative contaminant exposure concentrations (1L consumption per day)." sets out the cumulative monthly total contamination exposure for each of the VOCs the Marine or civilian was exposed to based upon the monthly average  $\mu\text{g/L-month}$ , and the number of days the Marine was on Camp Lejeune. Chart 1 calculations serve as a baseline template for the more detailed activity and proportionate exposure assessments in subsequent charts. In most instances this chart is simply days on base multiplied by  $\mu\text{g/L-month}$  for each VOC. This represents the total estimated exposure of a plaintiff if a default 1L volume of water was consumed, regardless of proportionate

---

<sup>1</sup> Bove depo, October 17, 2024, 296:25 – 297:9.

workplace/residence times (for example 1L at each location as a non-individualized baseline). This baseline chart was sometimes used to set up proportionate workplace/residence exposures as a template for later charts. Chart 1 is a template format for additional, individualized exposure assessment charts and is not intended to be used as a complete exposure assessment given only a 1 L estimated consumption volume.

Next, included in the report for plaintiffs are charts that provide a range of plausible exposure scenarios, informed by Marine or civilian activity reports. The total number of charts constructed varied based on deposition reported or assumed activities (for example training or consumption activities), based on ATSDR or Military Field Manual default drinking water ingestion volumes and the number of days per week attributed to routine or PT/field training activities, further differentiated based on the plaintiffs classification as a Marine in training, administrative personnel, civilian, or dependent. Activity classifications influenced estimated ingestion levels and plausible exposure ranges as well as proportionate exposure potential.

The number and format of additional charts constructed are dependent on plaintiff-specific data availability regarding the number of days of routine/light or heavy training activities and related estimates of water ingestion. If no activity or ingestion information was given in the plaintiff deposition, ATSDR default values were used to estimate the number of routine and heavy activities for a Marine in training to calculate cumulative contaminant exposure concentrations (ATSDR ingestion 6L/day 3 days per week and 3.1 L/day 4 days per week, or a combined reasonable maximum exposure, RME, and central tendency exposure, CTE, of 4.334 L/day). RME values assess exposures that are higher than average but still within a realistic exposure range while CTE values refer to persons with average or typical water intake rates (ATSDR, 2023).

Likewise, RME and CTE values for civilian workers and adult residents were estimated by the ATSDR and derived from the USEPA Exposure Factors Handbook (2011), at 3.092 L/day and 1.227 L/day, respectively. Additional ATSDR/USEPA estimates are given for a child aged 0-1 yrs (RME=1.113 L/day; CTE=0.504 L/day); 1-2 yrs (RME=0.893 L/day; CTE= 0.308 L/day); 2-3 yrs (RME=0.912 L/day; CTE=0.356 L/day); 3-6 yrs (RME=0.977 L/day; CTE=0.382 L/day) and 6-16 yrs (RME=1.69 L/day; CTE=0.574 L/day (ATSDR, 2017a). The values derived from applying the ATSDR assumptions demonstrate the Cumulative Consumption of each VOC contaminant on a monthly basis, and in total (TVOC). For each plaintiff, an Exposure Data Summary” table is also presented with cumulative totals for each individual charted scenario for each contaminant and exposure site location and also in total with all locations combined per contaminant.

For some plaintiffs, specific information was available in their deposition detailing their training and consumption habits. If their described ratio of heavy to routine/light training days differed from the ATSDR default assumptions, deposition-informed activity ratios were used. In addition, if consumption data was given, for example, recall of refilling and drinking a specific number of canteens (estimated to hold 32 oz each) during training, or a specific amount of coffee or tea (5-10 oz cups), “bug juice” or glasses of water (12 oz cups), or other beverage made from the contaminated water sources, deposition-informed ingestion data was used in the exposure assessment chart scenarios.

Similarly, information related to recommended ingestion volumes averaged from the four military field manuals was used to construct a separate chart using either ATSDR 3 days and 4

days per week of increased and decreased consumption levels due to heavy and routine training activities, respectively, or informed by deposition training activities where available. These charts utilize default values from military field manuals (FM) from 1957, 1970, 1980, and 1983. FM ingestion values were selected as recommended for a moderate temperature day in a tropical environment with temperatures exceeding 80°F and with differentiation between light and heavy activities. FM 1957-1983 defines light activities as desk work, guard/kitchen duties while heavy activities included forced marches, entrenching or route marches with heavy loads, or wearing protective clothing. FM light and heavy activity recommended water ingestion volumes averaged over the four field manuals were 5.21 L/day and 8.52 L/day, respectively, in a moderate climate. Default ATSDR 4 days and 3 days light and heavy activity days per week, respectively, was used in combination with FM ingestion estimates to calculate FM exposure charts unless data was available from the plaintiff's deposition that informed a change in activity level days. As with the prior charts, the values derived from applying the FM assumptions demonstrate the Cumulative Consumption of each VOC contaminant on a monthly basis, and in total (TVOC). For each plaintiff, an "Exposure Data Summary" table is also presented with cumulative totals for each individual charted scenario for each contaminant and exposure site location and also in total with all locations combined per contaminant.

In the case of a civilian dependent, time on base for lunch, friend visits, or other activities was estimated for a child aged 5-7 yrs. There are no deposition-informed data to calculate the actual number of hours the plaintiff spent on base during these visits and there is a paucity of data in the exposure science literature to estimate a child's stamina levels for activities outside the home in this age range. Xu et al., 2016 provide some guidance to estimate a 2-5-year-old child's outdoor playtime at 2.28-2.64 hrs/day but involved a younger age group and competing interest with screen-time activities. Here I use a 4-hr visit out of a 24-hour day and 2 visits per week as a plausible proportionate exposure day assumption.

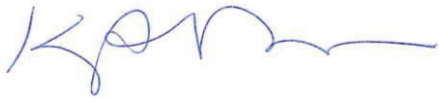

In another civilian dependent case, the plaintiff lived on base from about the ages of 2-16. They attended school at Hadnot Point and lived at Tarawa Terrace. Exposure scenario charts are presented using ATSDR RME and CTE default consumption values, prorated for school and residence proportionate time and over their progressive ages. An additional chart is presented using ATSDR RME values until the age category of 6+ where her deposition informed consumption levels were used.

As mentioned above, for each plaintiff, the cumulative results of the exposure assessment tables described are summarized in the attached "Exposure Data Summary." These tables provide a quick reference to the cumulative results of each of the different exposure calculations provided with a range of exposure assumptions or deposition-informed charts. Together, the tables provided are the product of my application of the methodology described above to the specific facts of each individual's available data.

The methods I have used in creating reasonably estimated cumulative consumption values of VOCs, and TVOCs, utilize standard methods that I have employed in my work as an environmental scientist and researcher. When possible, I have attempted to utilize objective data from verifiable sources, but like any forecasting model I have created previously, I have also had to rely upon subjective information at times as well. The methods utilized and the materials relied upon represent state-of-the-art methods for constructing competing models of exposure based on

available data. Further, the available data utilized in my calculations was derived from peer-reviewed sources, available testimony, and Military Field Manuals. Based on my education, training, and experience, these are the types of sources typically relied upon in my field. In situations like this where consumption and exposure variables are being reconstructed, it is common to provide a range of scenarios based on available data and a range of plausible exposure factors, which is what I attempted to do (ATSDR, 2023). While the varying reconstruction models provide differing exposure levels, presenting exposure results as a range of values is standard practice in exposure science and the methods and sources are sound. I state my findings to a reasonable degree of scientific certainty.

<sup>a</sup> Values from U.S. EPA Exposure Factors Handbook (USEPA, 2011); Ingestion Rate-Table 3-1 (consumers >5% percentile); Body Weight-Table 8-1 (50<sup>th</sup> percentile); Skin Surface Area-Table 7-1 (95<sup>th</sup> percentile)

<sup>b</sup> Values from U.S. EPA Dermal Risk Assessment Guidance (USEPA, 2004)

ADAF = age dependent adjustment factor for chemicals that act by a mutagenic mode of action (kidney cancer for TCE) (USEPA, 2005)

B = dimensionless ratio of the permeability coefficient of a compound through the stratum corneum relative to its permeability coefficient across the viable epidermis (unitless)

BW = body weight (kg)

CTE = central tendency exposure

ED = exposure duration (yrs)

IR = ingestion rate (L/day)

K<sub>p</sub> = permeability constant (cm/hr)

L<sub>a</sub> = apparent thickness of stratum corneum; used to calculate tau (cm)

L = lifetime (yrs)

RME = reasonable maximum exposure

tau = lag time per event (hours/event)

t<sub>90</sub> = time to reach steady-state (hours)

<sup>a</sup> Marine-in-training: assumes water ingestion rate of 6 L/day for 3x per week and 3.1 L/day for 4x per week, developed by combining information gathered from former Marines at the community assistance park meetings and recommended military fluid replacement guidelines (Kotik et al., 2005)

Total Days (week)	TCF (µg/2-4h)	Cumulative consumption (total days*concentration per deposition exposure assumptions)	PCE (µg/2-4h)	Cumulative consumption (total days*concentration per deposition exposure assumptions)	VC (µg/2-4h)	Cumulative consumption (total days*concentration per deposition exposure assumptions)	RZ (µg/2-4h)	Cumulative consumption (total days*concentration per deposition exposure assumptions)	3 days per week training heavy activity from deposition 1807-1825, moderate day, deserting/office c/for	4 days per week training light activity from deposition 1807-1825, moderate day, deserting/office c/for	Days per week

\*regular PT 3x per week; forced run 1x 3-4 months

\*2 cups coffee daily; pre-prepared

\*1L water per day with lunch and other times; from tap or hose

\*quantitative data recall minim at - use standard exposure assumptions for marine in training.

106,4583 number of days for 1x training sequence=average days in a month heavy training day every 3.5 months

3.67 number of heavy training days while in service= total days on basis sequence of event

0.01 proportional heavy training event per day averaged over total time on base given uncertainty of when heavy training activity occurred.

Chart 1: Days on base and cumulative contaminant exposure concentrations (1L consumption per day)

## CURRICULUM VITAE

**Kelly A. Reynolds, MSPH, PhD**

1295 N. Martin Ave.  
Mel and Enid Zuckerman College of Public Health

Tucson, Arizona 85724

Phone: (520) 626-8230 Fax: (520) 626-8009

E-mail: reynolds@email.arizona.edu

---

### **EDUCATION**

The University of Arizona, College of Agriculture and Life Sciences, Department of Soil and Water Science, PhD, 1995. Dissertation title: *Detection of Enteroviruses in Marine Waters Using RT-PCR*. Advisors: Charles P. Gerba and Ian L. Pepper. Major Field: Environmental Microbiology

The University of South Florida, Department of Environmental and Occupational Health, MSPH, 1992. Thesis title: *Evaluation of Methods for the Recovery and Quantitation of Bacteriophage from Marine Waters and Sediment*. Advisor: Joan B. Rose. Major Field: Environmental Microbiology

The University of Arizona, College of Arts and Sciences, BS, 1989. Major Field: Microbiology

### **EMPLOYMENT**

Interim Associate Dean for Research, Mel and Enid Zuckerman College of Public Health, The University of Arizona, September 2021-present

Professor, Community, Environment and Policy, Mel and Enid Zuckerman College of Public Health, The University of Arizona, 2018-present

Department Chair, Community, Environment and Policy, Mel and Enid Zuckerman College of Public Health, The University of Arizona, 2018-present

Associate Professor (Tenured), Community, Environment and Policy, Mel and Enid Zuckerman College of Public Health, The University of Arizona, 2012-2018

Associate Professor, Joint Appointment, Department of Soil, Water and Environmental Science, College of Agriculture and Life Sciences, The University of Arizona, 2006-present

Associate Professor, Community, Environment and Policy, Mel and Enid Zuckerman College of Public Health, The University of Arizona, 2006-2012

Assistant Research Scientist/Appointed Faculty, Department of Soil, Water and Environmental Science, Environmental Research Laboratory, College of Agriculture and Life Sciences, The University of Arizona, 1995-2006

Post Doctoral Fellow/Teaching Assistant, Department of Soil and Water Science, College of Agriculture and Life Sciences, The University of Arizona, 1995

Research Fellow, Department of Soil and Water Science, College of Agriculture and Life Sciences, The University of Arizona, 1992-1994

Research Assistant, Department of Environmental and Occupational Health, College of Public Health, The University of South Florida, 1989-1991

Research Technician, Department of Microbiology and Immunology, College of Agriculture and Life Sciences, The University of Arizona, 1987-1989

### **HONORS AND AWARDS**

Top two finalist, 2022 NIOSH Science and Service Award. Bullard-Sherwood Research to Practice Award Finalist for Intervention. (Honorable Mention Certificate) NIOSH COVID019 IPA Program: Expanding Occupational Health and Safety Expertise Through External Partnerships.

American Chemical Society (ACS) Omega, top 50 most outstanding articles to demonstrate quality of work published over the last 5 years. 2020. ACS Omega Announcement: [https://pubs.acs.org/page/acsodf/vi/5-year-celebration-acsomega?ref=vi\\_journalhome](https://pubs.acs.org/page/acsodf/vi/5-year-celebration-acsomega?ref=vi_journalhome)

Delta Omega, Alpha Nu chapter, Honorary Society, Faculty Member, 2019

Research featured on Chemistry Views, Wiley-VCH's chemistry portal. Noteworthy: Direct Pathogen Monitoring. March 12, 2018.

Research featured in the Association of Schools and Programs of Public Health, Friday Letters-Member research and reports. Arizona: Use of a Portable Air Disinfecting System to Remove Seeded Coliphage in Hospital Rooms. April 13, 2016.

Mel & Enid Zuckerman College of Public Health, Excellence in Research Award, 2015

Who's Who in Infection Prevention. One of 37 recognized as an outstanding individual working hard to advance the infection prevention and control agenda, as nominated by Infection Control Today readers, 2014

Nominated for the University of Arizona's 1885 Society Distinguished Scholar Award, 2013

Judges Choice Award for best linkage of scientific research to issues of concern within the community. Valdez, M.K. J.D. Sexton, **K.A. Reynolds**. Transfer and control of infectious

microbes in emergency vehicles. Environmental Research Grad Blitz. Tucson, AZ, November 2012

Nominated for the Mel & Enid Zuckerman College of Public Health Annual Award for Outstanding Contribution in the Area of Research. Ranked in top 3 of 58 faculty, 2011

Tucson Fire Department's Award of Service, 2010

William B. Fritzsche Memorial 2009 Top 50 International Award, for service and dedication to the water treatment industry.

Water Quality Association, Honorary Lifetime Member Award, 2009. In recognition of exceptional service given to the water quality improvement industry.

Water Conditioning and Purification International's Award of Appreciation for the most requested article reprints in journal history, 2008-2009

Water Conditioning and Purification International's Award of Appreciation to honor service and commitment to the Technical Review Committee, 2008-2009

UA-NASA Space Grant Award, 2007-2008

ASUA Enrichment Grant Award, 2007-2008

First place Poster Award, Public Health Graduate and Professional Student Council Showcase, 2007; Student advised: Jonathan Sexton

Academic Who's Who in Health Sciences Higher Education, 2007

Presentation voted "best of show". Invited speaker, *The Hazards of Indoor Mold*. 29th Annual Water Quality Association Conference. Las Vegas, NV. March 18-22, 2003

Travel Grant from WQA. Annual Convention and Symposium. Las Vegas, NV, 2003

Travel Grant from NSF. HPC Bacteria in Drinking Water. Geneva, Switzerland Symposium, 2002

Appointed member of the NSF/WHO Heterotrophic Plate Count Bacteria (HPC) Conference Steering Committee by the Water Quality Association Technical Board, 2000-2002

Foreign Travel Grant Award for faculty, 1996

American Society for Microbiology Sustaining Member Student Travel Grant, 1995

Travel Stipend from The Women in Science and Engineering Office, 1995

The United States Department of Agriculture National Needs Fellowship, 1992-1995

## **SERVICE/OUTREACH**

### **Media (abbreviated)**

Research has been featured in hundreds of unique local, national and international television, print and web outlets including: Television/Radio: *Fox News “Neil Cavuto News Hour”, The Today Show, PBS News Hour, EXTRA!, Inside Edition, CBS News, NPR “All Things Considered”, CNN, Chicago NBC 5, Phoenix KPHO News 5, CBS 5 News Phoenix, ABC 15 KNXV-TV Phoenix, KVOA 4 Tucson, Arizona Illustrated, The Office*; Magazines: *Redbook, InStyle, Dr. Oz, Ladies Home Journal, Women’s Day, Real Simple, Good Housekeeping, House Beautiful, Parade, Reader’s Digest, Parents, Health, Prevention, Self, Shape, Fitness, Men’s Health, Forbes, Conde Nast, American Baby, Consumer Reports, Essence, Cooking Light, Quick and Simple, Working Mother, Best Life, Bottom Line Health, All You, Arthritis Today, Walmart World, Life Science Weekly, Wall Street Journal, NY Times, NY Daily News, NY Business News, NY Daily Gazette, Charleston Gazette, Make it Better, Arizona Daily Star, Glow*; Webcasts: *BuzzFeed, Huffington Post, Yahoo! Health, Oprah.com, MSN.com, AARPonline, Consumer Affairs, MailOnline (UK), 774 ABC Melbourne, WeightWatchers.com, American Society for Microbiology’s Microbe World, Bronx New Moms, Grandparents.com, Bob Villa’s Healthy Home, Medical Observer, Mommycast.com* and others.

#### **Local and State Outreach (since 2012)**

COVID-19 Research, Response, and Lessons Learned. College of Pharmacy and the Mel and Enid Zuckerman College of Public Health Wonder at Home Series. Moderator. March 25, 2021

UAHS Expert Video Insights. What is the safest way to dry your hands? August 20, 2020.

AzPHA and UArizona faculty and staff open letter regarding COVID-19 response recommendations. <http://www.azpha.org/wills-blog/2020/7/28/open-letter-from-azpha-amp-university-of-arizona-faculty-and-staff-regarding-covid-19-response-recommendations>. July 28, 2020.

Infection Prevention: UArizona Shares Basic Fundamentals for Reopening. President Robert C. Robbins and Kelly Reynolds. <https://www.youtube.com/watch?v=6qBigpiwfVg> June 12, 2020.

Rotary Club of Tucson. Keynote. COVID-19 Workplace and Home Prevention Training. <https://www.youtube.com/watch?v=200DlvqormM>. June 4, 2020.

Arizona Water Innovation Challenge Video. Promoting water reuse through microbrewery competition. October 31, 2016. <https://youtu.be/oEXUD8XeZno>. Grand Challenge Winner.

UA Institute of the Environment, meeting of Department Heads and Directors, October 22, 2015

UA Campaign Video, March 2014

Water Safety Plan Development. University of Arizona Steward Observatory Mirror Lab. Student intern: Joli Jones, 2013

Mold Survey and Education Outreach. Northwest Fire District. 2012

**National Outreach** (since 2012)

Healthcare Infection Transmission Systems (HITS). Co-Founder and Steering Committee Vice-Chair. 2017-2021

Clean Water for All advocacy group. 2020

Applied Radiology Expert Forums. COVID-19 Special Series: Tips for Protecting Your Family. <https://event.on24.com/eventRegistration/EventLobbyServlet?target=reg20.jsp&referrer=&eventid=2301687&sessionid=1&key=395CA1D59B0B9ECD030254FF6F3A282E&regTag=&sourcepage=register>. May 14, 2020.

EMS Exposure Reduction Training. Partnership with Tucson Fire Department (TFD), Tucson Fire Fighters Association IAFF Local 479. <https://www.youtube.com/watch?v=GlbGJtfzHdE&feature=youtu.be> Posted March 21, 2020. (Impact: >20,000 views)

PreventLD Training. Preventing Legionnaires' Disease: A training on *Legionella* water management programs. <https://www.cdc.gov/nceh/ehs/elearn/prevent-LD-training.html> 2019-present

WQA Radio. Podcast. The impact of the Santa Clarita, California water softener ban. <https://soundcloud.com/user-141188699/wqa-radio-39-kelly-reynolds-on-santa-clarita-softener-ban>. September 28, 2017

AHE Learning Express Video Library. Soft surfaces contamination concerns in healthcare environments. September 27, 2016

AHE Learning Express Video Library. Quantitative risk modeling to evaluate microbial transmission patterns in healthcare environments. September 27, 2016

QMRA III Program Faculty- contributed content. Michigan State University. August 7-10, 2015

Water Laboratory Alliance Analytical Preparedness Full Scale Exercise (AP-FSE) Tool Kit Pilot. A collaboration with ESRAC, Tucson Water, and the Environmental Protection Agency (EPA). Certificate of Appreciation. June 26, 2016

EPA (Environmental Protection Agency). Expert review panelist for draft document, "Site-Specific Alternative Recreational Criteria Technical Support Material for Predominantly Non-Human Fecal Sources", March 2015

National Park Service. Environmental Predictors of Fecal Indicator Bacteria in Recreational Waters and Risk Communication at Five National Park Service Sites. Student intern advised: Rebecca Ragar, 2013

**International Outreach** (current and since 2012)

Global Biorisk Advisory Council (GBAC) Advisory Board Member, January 2022-present

COVID-19 Global Prevention Webinar. MEZCOPH. Speaker and panelist. April 1, 2020.

Codes and Standards CSA Cleaning and Disinfection Committee, focused on the development of healthcare cleaning standards in Canada. Founding member, 2018-2019

Environment, Exposure Science and Risk Assessment Center (ESRAC) website development. 2013-present

Quarterly author of De Le Llave, an educational column for Agua Latinoamérica, focused on current and emerging water quality issues in Latin America. Published in Spanish. 2001-2021

Monthly author of On Tap, an educational column for Water Conditioning and Purification International, focused on cutting-edge research in the field of environmental microbiology. 1997-present

Appointed to the Technical Review Council, Water Conditioning and Purification, 1996-2021

Redditt AMA. February 1, 2013. Second most popular AMA for the day; 277 points and 71<sup>st</sup> most popular topic on Redditt immediately following live post.

**Journal/Book Reviews** (since 2012)

Infection Control Tips, 2021

Journal of Occupational and Environmental Hygiene, 2014; 2016; 2017

Journal of Water and Health, 2012; 2017

Journal of Occupational and Environmental Health, 2014; 2016

Saudi Journal of Medicine & Medical Sciences, 2016

Integrative Environmental Health, Cohen and vom Sal (Eds.), The Weil Integrative Medicine Library, 2015

American Journal of Infection Control, 2014

International Journal of Environmental Research and Public Health, 2013

Journal of Virological Methods, 2012-2013

Public Health, 2012

**Departmental Committees (since 2012)**

Mentor, Marc Verhougstraete, Assistant Professor of Environmental Health Sciences, Mel & Enid Zuckerman College of Public Health, University of Arizona, 2016-2019

Mentor, Robert Canales, Assistant Professor of Environmental Health Sciences, Mel & Enid Zuckerman College of Public Health, University of Arizona, 2015-2019

Environmental Health Sciences, Program Director 2015-2017

Education Committee, Member 2015-2017

Community, Environment and Policy, Promotion and Tenure Committee, Member 2015-2017

Reviewer/Chair. Annual Faculty Performance Reports. Community, Environment and Policy Division, 2016 (Chair); 2017 (Chair); 2018 (Chair)

Mentor, Heidi Brown, Assistant Professor of Epidemiology and Biostatistics, Mel & Enid Zuckerman College of Public Health, University of Arizona, 2013-2016

Faculty Search Committees, 2012; 2013; 2014; 2015; 2016; 2017; 2018

Director of Graduate Studies, 2015

**College Committees (current and since 2012)**

Director, Western Region Public Health Training Center (WRPHTC), 2021-present

Director, Environment, Exposure Science and Risk Assessment Center (ESRAC), 2013-present

2022 Arizona Center for Rural Health (AzCRH) Advancing Health Equity, Addressing Disparities in Arizona (AHEAD) Advisory Committee Member

MEZCOPH Activity Informed Budget (AIB) Advisory Committee Member, 2021

2020 COVID-19 MEZCOPH Response Task Force

2019 CEPH MEZCOPH Self Study Task Force

2018 Public Health Poster Forum Judge. April 9, 2018

Research Advisory Council, 2006-2017

One Health Admissions Review Committee, 2017

MEZCOPH Curriculum Planning Committee 2016-2017

Public Health Research Poster Forum Judge. March 29, 2016

Promotion and Tenure Review Committee, 2010-2015

Search Committee, Biostatistics Faculty, 2013

Global Health and Community Development Committee, 2011-2013

**University Committees** (current and since 2012)

Institute for Environment and Science, Advisory board, member, 2008- present

Appointed Executive Committee Member. UA Water Quality Certificate Program, 2007-present

UA Water Sustainability Program (WSP) Academic Advisory Committee, 2007-present

Member, UA Health Sciences Strategic Planning Advisory Committee. 2018-2020

Search Committee, College of Social and Behavioral Sciences, TRIS/WEES Joint Hire in Environmental Health, 2017-2018

One Health MPH, Executive Advisory Committee, 2015-2017

Water, Environmental, and Energy Solutions (WEES) UA Advisory Committee, 2015-2017

Water, Energy, Sustainability and Technology (WEST) Center Search Committee, 2015-2016

UA Food Safety Consortium, member 2014-2016

UA Environmental Social Scientists Workshop, 2015

AAHRPP IRB Review member, 2014

Dean's 5 Year Review Committee, 2014

Faculty Advisor. UA Thirst Project Club, 2012-2014

Institutional Review Board Committee, 2012-2014

UA Faculty Senate IT Committee, 2012-2014

UA Faculty Senator, at-Large Faculty Senate Representative, 2009-2011; re-elected 2011-2013

Graduate Interdisciplinary Program Committee on Global Change (ISPE), Faculty advisor, 2007-2012

**External Committees** (current and since 2012)

ASSE Certification Advisory Board. Member 2019- present

Promotion and Tenure Review, Candidate for Promotion to Full Professor, Tulane University, 2021

Promotion and Tenure Review, Candidate for Promotion to Full Professor, Drexel University, 2019

Public Health Editor, Water Conditioning and Purification International. 2010- present

Water Quality Association (WQA) Sustainability Review Board and Certification Program Co-Chair. 2017-2020

Arizona Public Health Association. Member 2018

Promotion and Tenure Review, Candidate for Promotion to Associate Professor, Michigan State University, 2017

Advisory Panel on Emerging Contaminants, Arizona. Department of Environmental Quality. 2014-2016

**DEVELOPMENT ACTIVITIES**

Introduction to Strategic Planning Certificate, October 11, 2021

Preventing Harassment and Discrimination Certificate, October 6, 2021

FERPA Training Course Certificate, August 30, 2021

HIPAA Annual Certification, August 25, 2021

CITI Certification, July 19, 2021

Biosafety Level 3 Protection Course Certificate, April 7, 2021

Information Security Awareness Annual Refresher Course Certificate, March 23, 2021

Teaching workshop- Group Work. OIA. August 30, 2019

Course audit, CPH 604 Applied Math in Environmental Health Sciences. Spring 2017

Making the Most of the Opening and Closing Minutes of Class Time. Teaching development webinar training with Dr. Jim Lang. February 16, 2017

### **COURSES TAUGHT (since 2012)**

CPH 418/518 Quantitative Human Health Risk Assessment. A course designed relative to practice and research within the risk analysis paradigm including: risk assessment, risk management and risk communication.

CPH 484/584 Fundamentals in Environmental and Occupational Health. A core course in the basics of quantitative exposure assessment and hazard identification.

CPH 575 Environmental and Occupational Health. A core course in environmental health sciences and occupational health and safety practice and research.

CPH 696r Environmental and Occupational Health Seminar. Special topics and career development in EOH.

EHS 420/520 Environmentally Acquired Illnesses. A course in emerging infections from a mixture of environmental hazard exposures.

- La Preparación tiene que Mitigar los Brotes Inevitables de Enfermedades a Nivel Mundial. January 2020. <http://agualatinoamerica.com/2020/01/15/la-preparacion-tiene-que-mitigar-los-brotes-inevitables-de-enfermedades-a-nivel-mundial/>
- El Riesgo Incierto de las Exposiciones a las Piretrinas. November 2019

- De la Exposición a la Enfermedad: ¿Qué Pasa Si Usted Bebe Agua Contaminada? September 2019
- Microplásticos en el Agua Potable. July 2019
- Un Nuevo Programa de Capacitación en Línea: Prevención de la Enfermedad del Legionario. May 2019
- Agua Potable, Aguaceros y Enfermedades. March 2019
- El Futuro de la Calidad del Agua y la Sostenibilidad. January 2019
- Hepatitis A: Enfermedad Emergente y Rutas Potenciales de Transmisión a través del Agua. [Hepatitis A: Emerging Disease and Potential Transmission Routes through Water] January 2018
- Recuentos Menores de Espermatozoides Asociados con Contaminantes Propagados a través del Agua en el Mundo Desarrollado. [Decreased Sperm Counts Associated with Waterborne Contaminants in the Developed World] September 2017
- Controlando los Subproductos de la Desinfección en las Piscinas. [Controlling DBPs in Swimming Pools] August 2017
- Con Vigencia Inmediata: Se Requiere que los Establecimientos de Cuidado de Salud Reduzcan los Riesgos de Contraer Legionelosis del Agua de la Llave [Effective Immediately: Healthcare Facilities Required to Reduce Tap] July 2017
- Lluvias de Verano Aumentan el Riesgo de Virus Humanos en el Agua Subterránea [Summer Rains Increase Risk of Human Viruses in Groundwater] June 2017
- Búsquedas de Internet Ayudan a Seguir la Pista de las Enfermedades Transmitidas por el Agua [Internet Queries Help Track Waterborne Disease] May 2017
- Efectos Inciertos del PFOA y PFOS [Uncertain Effects of PFOA and PFOS] April 2017
- Filtros de Punto de Uso para el Hogar: Centinelas para el Monitoreo a Largo Plazo del Agua de la Llave [Household POU Filters: Sentinels for Long-term Tap Water Quality Monitoring] March 2017
- Virus Prevalente del Chile: Un Marcador de la Contaminación [Prevalent Pepper Virus: A Contamination Tracker] February 2017
- Filtración en el Punto de Uso: Algo Esencial para un Plan de Seguridad del Agua [POU Filtration: A Water Safety Plan Essential] January 2017
- Arsénico en Pozos Privados: Un Peligro Poco Reconocido [Arsenic in Private Wells: An Under-recognized Hazard] December 2016
- Comprendiendo el Impacto de la Fracturación Hidráulica “Fracking” en la Calidad del Agua Potable [Understanding the Impact of Fracking on Drinking Water Quality] November 2016
- Dispositivos de PDU Esenciales para Reducir Enfermedades y Mortalidad en Países Menos Desarrollados [POU Devices Key for Reducing Illness and Death] October 2016
- ¿Debiéramos Implementar una ‘Ley de Agua Segura para Respirar?’ [Should We Implement a ‘Safe Breathing Water Act?’] September 2016

- Eliminando el Cloro Residual del Agua de la Llave [Eliminating Chlorine Residuals from Tap Water] August 2016
- El aumento de la *Legionella* [The Rise of *Legionella*] July 2016
- Problemas de Agua Potable Preocupan a los Estadounidenses [Drinking water problems concerning Americans] June 2016
- *Elizabethkingia*: Un Patógeno Mortal y Emergente Potencialmente Vinculado al Agua [Elizabethkingia: A deadly and emerging pathogen potentially linked to water] May 2016
- Nosotros podemos librar a nuestro abastecimiento de agua potable de plomo? [Can We Rid Our Drinking Water Supply of Lead?] April 2016
- Las Diferencias en los Muestreos del Agua Generan Análisis de Riesgos Deficientes [Water sampling differences lead to flawed risk assessments] March 2016
- Condiciones Corrosivas—Cómo Afecta a la Salud Pública Este Problema tan Común [Corrosive Conditions- How this Common Issue Impacts Public Health.] February 2016
- Asuntos de Agua: Inquietudes Globales y Asuntos Globales [Water Issues: Global Concerns and Global Issues] January 2016
- Nuevas Herramientas para Evaluar los Riesgos del Agua Subterránea [New tools for assessing groundwater risks] December 2015
- Desinfección del Agua Potable: Opciones y Gestión de Peligros [Drinking Water Disinfection: Options and Hazard Management] November 2015
- La Metadona Crea Subproductos Dañinos en el Agua Potable Tratada [Methadone Creates Harmful Byproducts in Treated Drinking Water] October 2015
- *Legionella* Un Peligro Formidable Propagado a través del Agua [Legionella: A Formidable Danger Spread Through Water] September 2015
- Las Aguas más Tibias Aumentan la Producción de Algas Tóxicas [Warmer Waters Heighten Toxic Algae Production] August 2015
- La Filtración del Agua en el PDU Salva Vidas en California [POU Water Filtration Saving Lives in California] July 2015
- Prevención en el Punto de Uso de Infecciones Contraídas a través del Agua durante el Cuidado de la Salud [POU Prevention of Healthcare Acquired Waterborne Infections] June 2015
- ¿Por qué Utilizar un Dispositivo de PDU? [Why use a POU device] May 2015
- Riesgo y Gestión de Residuos Industriales en las Fuentes de Agua Potable [Industrial Waste Risk and Management in Drinking Water Sources] April 2015
- Celebrando el 40mo Aniversario del Acta del Agua Potable Segura y Reconocimiento de los Retos Futuros [Celebration of the Safe Drinking Water Act's 40th Anniversary and Recognition of the Challenges Ahead] March 2015
- La percepción Humana es un Mal Indicador de la Preocupación por la Calidad del Agua [Human Perception is a Failed Indicator of Water Quality Concern] February 2015
- Aguas Grises: Un Repaso de su Reutilización y Riesgos [Graywater: Reuse and Risks Revisited] January 2015

- Flujos Excesivos de Aguas Cloacales Impactan Ciudades de EEUU/Salud Pública [Sewage Overflows Impact US Cities/Public Health] December 2014
- ¿Es el Ébola un Virus Propagado por el Agua? [Is Ebola a Waterborne Virus?] November 2014
- Contaminantes Propagados a través del Agua y Aumento en la Incidencia del Síndrome de Intestino Irritable [Waterborne Contaminants and Increasing Incidence of Irritable Bowel Syndrome] October 2014
- Guía para la Industria del Punto de Uso: Informe de la AWWA sobre el Estado de la Industria del Agua [Guidance for the POU Industry: AWWA's State of the Water Industry Report] September 2014
- Evaluación de la Amenaza de Amebas de Vida Libre en el Agua Potable [Threat Assessment of Free-Living Amoeba in Drinking Water] August 2014
- Riesgos a la Salud Asociados con las Conexiones Transversales en el Suministro de Agua Potable [Health Risks Associated with Cross-connections in Drinking Water Supply] July 2014
- Amenazas Urgentes de Organismos Resistentes a los Antibióticos [Urgent Threats from Antibiotic-Resistant Organisms] June 2014
- Nuevos Riesgos de Propagación a través del Agua: Un Estudio del caso del Derrame Químico de Virginia Occidental [New Waterborne Risks: A Case Study of West Virginia's Chemical Spill] May 2014
- Enterovirus 68 el Reciente Surgimiento de un Síndrome Parecido al Polio [Enterovirus 68 and the Recent Emergence of a Polio-Like Syndrome] April 2014
- ¿Sabe Dónde Están Sus Ftalatos? [Do You Know Where Your Phthalates Are?] March 2014
- Virus Basado en el Agua Podría Causar Artritis Reumatoide [Water-based Virus May Cause Rheumatoid Arthritis] February 2014
- Las Ciudades Principales de los EEUU Están Quedándose sin Agua [Major US Cities Running Out of Water] January 2014

## **WORKS IN PROGRESS**

### **Refereed journal articles pending**

Manoogian, M.K., M.P. Verhougstraete, R.A. Canales, J.L. Burgess, E. Oren, **K.A. Reynolds**. Microbial diversity evolution of surfaces within a newly opened skilled nursing facility, healthcare workers, and their homes. *Environment International*. *Submitted*. 10/26/20

Wilson, A.M., Abney, S.E., **Reynolds, K.A.** Can continuously active antimicrobial surface coatings reduce risks of viral and bacterial infections? *In preparation*.

Abdel Shakour, M.A., R.A. Abdel Salam, G.M. Hadad, D.T.A. Youssef, **K.A. Reynolds**. Monitoring of cyanobacterial toxins in Suez Canal region's freshwater, Egypt. *Analytical Chemistry Letters*. *In progress*.

- Canales, R.A., S. Littau, J.D. Sexton, **K.A. Reynolds**. Development of a Simple Return-On-Investment Calculator for Hand Hygiene Compliance Systems Aimed at Preventing Healthcare Acquired Infections. *American Journal of Infection Control. In progress.*
- Lee, V.S.T, C.R. Sterling, E. A. Lutz, J.L. Burgess, **K.A. Reynolds**. Factors that influence the parasite-host attraction of *Schistosoma mansoni* and *S. japonicum*: assessment of oleic acid and cercarial age. *In progress.*
- Troup, D., M.P. Verhougstraete, J.D. Sexton, **K.A. Reynolds**. Bioaerosol Reduction with a Passive Air Treatment System in a Controlled Chamber. *Journal of Infection Prevention. In progress.*
- Scanlon, M.M., P. Hsu, R. Carmona, E. Lutz, **K.A. Reynolds**. Systematic Review and Meta-Analysis: Developing a Benchmark for Evaluating Perceived Stress in Nursing Professionals. *Research in Nursing & Health. In progress.*
- Scanlon, M.M., E. Lutz, P. Hsu, C. Etland, **K.A. Reynolds**. Ranking nursing stress risk factors using quantitative models for occupational stress risk assessment. *International Journal of Stress Management. In progress.*
- Scanlon, M.M., P. Hsu, R. Carmona, E. Lutz, **K.A. Reynolds**. Role of nature contact: enhancing health-promoting lifestyles to mitigate perceived stress in Southern California RNs. *Health Promotion Practice. In progress.*
- Sexton, J.D., **K.A. Reynolds**. Indoor mold control on porous surfaces using household bleach. *Journal of Environmental Health. In progress.*

### **Grant proposals in progress**

- Reynolds, K.A., Verhougstraete, M., Sexton, J.D, Wilson, A. Intervention assessment to reduce HAI pathogens and risks in long-term care facilities. 25% effort. AHRQ via NIH. \$2,000,000

### **PRESENTATIONS**

#### **Invited**

- Reynolds, K.A.** Evaluating Hygiene Intervention Impacts on Infectious Disease Transmission: Utilizing Microbial Tracers and QMRA Modelling to Quantify Mitigation Effects and Estimate Human Health Outcomes. Reckitt Professional Seminar. January 24, 2022. 58 participants
- Reynolds, K.A.** Tucson Fallen Fire Fighters Memorial. January 22, 2022. Tucson, AZ
- Reynolds, K.A.** Continuously Active Disinfectants: Addressing Challenges of Surface Contamination and Biofilm Growth. Cleaning, Disinfection and Sterilization Conference,

Association for Professionals in Infection Control and Epidemiology (APIC). October 28-29, 2021

**Reynolds, K.A., C.P. Gerba, B. Adair.** Infection Control and Risks: SARS-CoV-2 and other Virus Expertise at UArizona. September 14, 2021. Tucson, AZ

**Reynolds, K.A.** Risk Communication and Building Public Trust. Water Quality Association (WQA) Convention & Exposition. July 28-30, 2021. Las Vegas, NV.

**Reynolds, K.A.** Continuously Active Disinfectants: Addressing Challenges of Surface Contamination. TIPS Master Class. Zoom online. (approved for 1.0 contact hour of continuing education credits for nurses). June 22, 2021; 280 registrants, 1,758 views.

**Reynolds, K.A.** Evaluating Hygiene Intervention Impacts on COVID-19 Infections. Universidad Popular Autonoma del Estado de Puebla (UPAEP). Zoom webinar. June 8, 2021

**Reynolds, K.A.** Home Hygiene: Keeping Your Home Clean, Safe, and Healthy. UAHS Wellness Wednesdays. June 9, 2021

**Reynolds, K.A.** Hospitality Re-Entry: Hygiene and Human Health: Utilizing Microbial Tracers and QMRA Modelling to Quantify Infection Risks and Intervention Impacts. RESTRUCT Symposium. May 17, 2021.

**Reynolds, K.A.** How Clean is Clean? Environmental Risks of HAIs. Munich RE Specialty Insurance Healthcare Risk Management Webinar. January 27, 2021.  
<https://attendee.gotowebinar.com/recording/3846126171433690886> (approved for 1.0 contact hour of continuing education requirements of ASHRM FASHRM (Fellow) and DFASHRM (Distinguished Fellow) and Certified Professional in Healthcare Risk Management (CPHRM) renewal

**Reynolds, K.A.** COVID-19 Occupational Assessment and Transmission Prevention. MEZCOPH Community Advisory Board. Zoom webinar. May 5, 2020

**Reynolds, K.A.** COVID-19 Workplace Prevention. YWCA Southern Arizona Small Businesses. Zoom Webinar; Facebook Live. April 30, 2020

**Reynolds, K.A.** Video to Guide EMS Exposure Reduction. Joint Public Safety Sector (PSS) Council and Healthcare and Social Assistance (HCSA), NORA Council Meeting. Sustaining Emergency Medical Services during COVID-19. March 26, 2020

Sexton, J.D., **K.A. Reynolds.** Smartphone Water Quality Monitoring Field Demonstration. AZ Water Research Symposium, Gateway Community College, Phoenix, AZ. January 9, 2020.

**Reynolds, K.A., J.Y. Yoon, S. Chung.** Smartphone for Water Quality: Smartphone Detection from Paper Microfluidics for Monitoring Water Quality. National Science Foundation Water & Environmental Technology (WET) Center Semi-annual Meeting. Tempe, AZ. December 6, 2019.

**Reynolds, K.A., J.D. Sexton.** Getting Down and Dirty with Environmental Health Concerns. Keeping Up With Public Health podcast. Western Region Public Health Training Center. September 25, 2019. <https://www.listennotes.com/podcasts/keeping-up-with/episode-4-getting-down-and-vQLauNbE3fm/>

**Reynolds, K.A., A.M. Wilson, R.A. Canales.** Estimating effects of human behaviors and cleaning interventions on infection risk using QMRA. Canadian Standards Association. Webinar. Vancouver, BC, Canada. November 19, 2018.

**Reynolds, K.A.** Household POU Pathogen Study. WQA Radio Podcast, “In the Know” WQRF Webinar. November 14, 2019. <https://soundcloud.com/user-141188699/wqa-radio-148-kelly-reynolds/s-wjbbW>

**Yoon, J.Y., K.A. Reynolds.** Field Testing of Real-Time Detection of Human Pathogenic Viruses Using Smartphone Technology. Water and Environmental Technology Center. December 12, 2019.

**Reynolds, K.A., J.Y. Yoon, S. Chung.** Smartphone Norovirus Detection in Water using Paper Microfluidics. WEST Center Industry Meeting. November 18, 2019.

**Reynolds, K.A.** In the Know Series: Household Point-of-Use Pathogen Study. Water Quality Research Foundation Webinar. November 14, 2019.

**Reynolds, K.A.** QMRA Work Group Update. Healthcare Infection Transmission Systems (HITS) Conference. Nashville, TN. September 14, 2018.

**Wilson, A.M., R.A. Canales, K.A. Reynolds.** Utilizing Modeling Approaches to Estimate Infection Risks, Intervention Efficacies, and Microbial Reductions Needed to Meet Risk Targets. Healthcare Infection Transmission Systems (HITS) Conference. Nashville, TN. September 14, 2018.

**Reynolds, K.A.** Environmental Health Capacity Building. Northern Pacific Environmental Health Association (NPEHA) Conference. Guam. July 19, 2018.

**Verhoughstraete, M.P., J. Gerald, K.A. Reynolds, C.P. Gerba.** Cost-Benefit of Point of Use Devices for Lead Reductions. American Water Works Association. Denver, Co. June 11, 2019.

**Reynolds, K.A.** Water Quality Monitoring and Cost Benefits of POU Devices. 2019 Water Quality Association Conference and Exposition. Las Vegas, NV. April 24, 2019.

**Wilson, A.M., K.A. Reynolds, M.P. Verhoughstraete, R.A. Canales.** Using Simulation Modeling to Estimate the Effect of Human Behaviors and Cleaning Interventions on Infection Risk. American Society of Safety Engineers (ASSE). Tempe, AZ. April 19, 2018

**Reynolds, K.A.** Study Briefs: Cost Benefit of POU Filters; Household POU Filters for Monitoring of Tap Water. Water Quality Association Annual Convention and Exposition. Denver, CO. March 28, 2018.

- Reynolds, K.A.** Strategic Plan for Future Research Initiatives Advancing the POU/POE Industry. Water Quality Research Foundation Development Luncheon. Keynote. Water Quality Association Annual Convention and Exposition. Denver, CO. March 25, 2018.
- Reynolds, K.A.** Household POU Filters: Tools for Long-term, Large Volume Monitoring of Tap Water Quality and Human Health Risks. Water Quality Association Annual Convention and Exposition. Denver, CO. March 25, 2018.
- Reynolds, K.A., J.Y. Yoon.** Monitoring Water Safety using Smartphone Detection from Paper Microfluidics. 2017. NSF and the Water, Environment and Technology Center Annual Meeting. Tempe, AZ. December 6, 2017.
- Reynolds, K.A.** Valuation of Intervention Impacts in Healthcare using the Evidence Based Science of Quantitative Risk Assessment Modeling. Environment Hygiene Interest Group (EHIG) for Infection Prevention and Control Canada (IPAC). Webinar. November 14, 2017.
- Reynolds, K.A.** Review of the Risk, Communication and Perception of the Santa Clarita Valley Water Softener Ban. Pacific Water Quality Association (PWQA) Annual Meeting. Newport Beach, CA. October 3, 2017.
- Reynolds, K.A.** Surface Decontamination: Challenges and Perspectives. Healthcare Infection Transmission Consortium. Ann Arbor, MI. September 13, 2017.
- Reynolds, K.A., C. Greene.** Catalyst for Change: Overview of the Healthcare Infection Transmission Systems (HITS) Consortium. Ann Arbor, MI. September 13, 2017.
- Reynolds, K.A.** Review of the Risk, Communication, and Perception of the Santa Clarita Valley Water Softener Ban. WQA Annual Leadership Conference. San Diego, CA. September 12, 2017.
- Reynolds, K.A.** Waterborne Threats in the U.S.: Understanding the Impact of Persistent and Emerging Contaminants. Culligan Dealers Association of North America, Inc. (CDNA) Convention and Product Fair 2017. St. Louis, MO. April 26, 2017.
- Reynolds, K.A.** Santa Clarita Water Softener Ban and Agricultural Impacts. Water Quality Association Convention and Exposition, Regional and State Government Affairs Committee. Orlando, FL. March 28, 2017.
- Pearce-Walker, J., J.D. Sexton, M.P. Verhougstraete, **K.A. Reynolds**, K. Bright. Enteric Viruses as New Indicators of Human and Cattle Fecal Contamination of Irrigation Water. Water and Energy Sustainable Technology Center, University of Arizona. December 12, 2016.
- Reynolds, K.A., J.Y. Yoon, S. Chung.** Norovirus Detection Using Fluorescence Microscopy. NSF and the Water, Environment and Technology Center Annual Meeting. Tempe, AZ. December 8, 2016.

**Reynolds, K.A.** Smartphone for Water Quality: Smartphone Detection from Paper Microfluidics for Monitoring Water Safety. Arizona Water Conference. Phoenix, AZ. November 4, 2016.

**Reynolds, K.A.** Keynote speaker. Water Threats: Known and Unknown. PHSI Dealer Meeting. Las Vegas, NV. October 6, 2016.

**Reynolds, K.A.** Quantifying the Impact of Environmental Services in Infection Prevention: Use of Risk Assessment Modeling Tools to Evaluate Interventions in Infection Control. Association for the Healthcare Environment (AHE) Exchange 2016. Pittsburgh, PA. September 28, 2016.

**Reynolds, K.A., R.A. Canales.** Return on Investment Models for Hand Hygiene Compliance Monitoring Systems and Healthcare Acquired Infection Prevention. 43<sup>rd</sup> Annual Educational Conference of the Association for Professionals in Infection Control (APIC), Breakfast Symposium. Charlotte, NC. June 13, 2016.

**Reynolds, K.A.** Water and Your Health. The Third Annual Environmental Science and Health Youth Conference. Tucson, AZ April 28, 2016.

**Reynolds, K.A.** Keynote speaker. Waterborne Pathogens: Emerging Issues in Monitoring, Treatment and Control. Multipure Annual Conference and Exposition. Henderson, NV. April 16, 2016.

**Reynolds, K.A.** How to Work with PR and the Media. Mel & Enid Zuckerman College of Public Health Faculty Development Meeting. Tucson, AZ February 12, 2016.

**Reynolds, K.A.** 2016 Arizona Water Research Workshop. Smartphone App and Risk Assessment Model Development. Tempe, AZ, January 14, 2016.

**Reynolds, K.A.,** Germ Geography: Understanding Public Infection Spread. GOJO/Essendant Conference. San Diego, California. December 7, 2015.

**Reynolds, K.A., J.Y. Yoon.** Smartphone for Water Quality: Smartphone Detection from Paper Microfluidics for Monitoring Water Safety. Water and Environmental Technology Center/ National Science Foundation industry/University Cooperative Research Center Annual Meeting. Tucson, AZ. December 10, 2015.

**Reynolds, K.A.** Invited Speaker. Mel & Enid Zuckerman College of Public Health Scholarship Luncheon. Arizona Inn, Tucson, AZ, October 30, 2015.

**Reynolds, K.A., L. Lybert, J.D. Sexton.** Evaluation and Control of Infectious Microbes in Healthcare Environments: New Evidence for Best Practices. AHE Exchange 2015. Grapevine, TX, September 21, 2015.

**Reynolds, K.A.** Invited Participant. Environmental Hygiene: Ebola and Other Emerging Pathogens in Healthcare. Centers for Disease Control and Prevention Headquarters. Atlanta, GA, September 14, 2015.

**Reynolds, K.A.** WQA Research Final Report: Boil Water Notices in the U.S., 2012-2014. Water Quality Association Mid-year Meeting. Tucson, AZ, September 2, 2015.

**Reynolds, K.A.** M.P. Verhoughstraete, A.H. Tamimi, C.P. Gerba. Point-Of-Use Water Treatment Cost-Effectiveness Analysis. Water Quality Association Mid-year Meeting. Tucson, AZ, September 2, 2015.

## **PATENTS**

Single Copy Level Detection of Virus through Particle Counting on Paper Microfluidics Using Smartphone Based Fluorescence Microscope. Yoon, JY, KA Reynolds, S Chung. Provisional patent: UAZ-0150000\_UA20-057

## **GRANTS AND CONTRACTS (since 2006)**

### **Current grants (Federal)**

Assessment of SARS-CoV-2 Viability and Persistence in Sewage Samples Across the United States Using In Vitro Cell Culture and Molecular Methods. (75D30121C12722) 4% effort, co-PI. Centers for Disease Control and Prevention (CDC). \$349,674. 9/27/2021-9/26/2022

Advancing Safety and Reliability to Protect Public Health: Identifying Quantitative Reductions of Viral Pathogens and Surrogates for Water Reuse Applications. 3.3% effort, co-I. Federal: US Environmental Protection Agency (USEPA). (5126/8402600). Water Research Foundation (WRF), \$1,239,813; UA subcontract, \$1,100,000; 7/01/2021-6/30/2024

Western Region Public Health Training Center. (UB6HP31687) 25% effort. PI. NIH Health Resources and Services Administration (HRSA). Total award: \$4,0153,812; 2021-2022: \$1,502,890. 7/01/2021-6/30/2022

Intergovernmental Personnel Agreement. 20% effort, PI. National Institute for Occupational Safety and Health (NIOSH). \$90,520. 7/1/2020-6/30/2022

### **Current grants (State/Foundation/Industry/Other)**

Quantitative Evaluation of Air, Surface, and Hand Contamination Potentials and Impact on Microbial Exposure and Risk Assessment. 5% effort. PI. Industry: Splashblocker, Inc. \$162,968. 12/14/21-12/13/2022

Exposure Assessment and Risk Impact of Air Dryers. 1% effort. PI. Industry: Excel Dryer, Inc. \$76,997. 11/09/21-11/08/22

Evaluation of a real-time smartphone-based detection method for sensitive and specific detection of PFAS compounds. .01% effort, PI. Water, Environment and Technology Center (WET) Membership Agreement, University of Arizona. \$15,000. 09/01/2021-08/31/2022

Water Quality Emerging Contaminants. 5% effort, PI. Industry: Intergovernmental Agreement: Tucson Water. Development of Consumer Outreach and Risk Communication Tools. \$88,000. 12/08/2020-04/30/2022

Consumer Tools for Understanding Water Quality Contaminants and POU/POE Options. 5% effort. PI. \$49,978. 12/8/20-4/30/22

Pilot Study: Evaluation of Hand Hygiene Intervention Efficacies Using In Vitro Methods and a Simulated Food Service Scenario. 3% effort, PI. Industry: Ecolab. \$97,135. 12/28/2020-03/01/2022

### **Completed Research Support**

#### **Completed grants (since 2006)**

Emergency Medical Service QMRA modelling on UV Impacts on Microbial Contaminants. GHSP. 1% effort, PI. \$23,900. 03/15/20-05/15/21

Airplane Validation Testing, COVID Response (2020-GT-PA-144). 5% effort, Co-PI. Industry: Boeing Aerospace Company. \$161,442. 07/01/2020-06/30/2021

Single Copy Level Detection of Virus through Particle Counting on Paper Microfluidics Using Smartphone Based Fluorescence Microscope. co-PI. Tech Launch Arizona (TLA). \$37,806. 10/19/20-05/14/21

Bioaerosol Sampling for Quantitative Exposure Assessment of Airborne SARS-CoV-2 in a Wastewater Facility. 1% effort, Co-PI. University of Arizona COVID-19 Rapid Turn-Around Seed Grant/TRIF. \$59,840. 4/6/20-10/4/20

Impact of Antibacterial Soap in a Food Service Establishment. 5% effort, Co-PI. Industry: EcoLab. \$188,749. 7/31/2019-7/31/2020

Evaluation of Whole Room Disinfection and Terminal Cleaning Efficacies in Healthcare. 5% effort, PI. UA Foundation; Nevoa. \$33,720. 7/24/2017-7/23/2020

Hand Sanitizer Healthcare Worker Observations. GOJO. \$22,583. 02/06/20-07/17/20

Water Quality Emerging Contaminant. 5% effort, PI. Federal/State: NSF-WET Center; Tucson Water. \$88,517. 8/01/2018-06/30/2020

Development of a One Health Undergraduate Program with a Global Reach. 5% effort, Co-PI. State: University of Arizona Provost Investment Fund. \$157,000. 12/15/2019-12/15/2020.

City Hygiene Review. City of Tucson. \$26,864. 06/15/20-12/15/20

Combined Surface Sampling and Quantitative Microbial Risk Assessment Modeling to Optimize Surface Cleaning for Targeted HAI Reduction. 5% effort, Co-Investigator. Centers for Disease Control and Prevention (CDC). \$509,990. 10/1/2018-9/30/2019.

Using QMRA to Estimate Risk Target Compliance for Showering Events. 1% effort, PI. UA Foundation; Ecolab. \$15,000. 2/20/2019-2/19/2020

Cost Benefit of Point-of-Use Devices in Reduction of Health Risks from Drinking Water. 10% effort, PI. Water Quality Research Foundation. \$56,009. 9/24/2015-1/3/2019

Thermophilic Amoeba Evaluation in a Municipal Water Treatment System. 1% effort. PI. Aurora Water. \$4,018. 6/30/19-12/30/19

Residual Surface Disinfectant Impacts in a School Setting. 1% effort, co-PI. Enviro-Master. \$8,000. 9/8/19-11/20/19

Household POU Filters: Tools for Long-term, Large Volume Monitoring of Tap Water Quality and Human Health Risks. 5% effort, Principal Investigator. Foundation: Water Quality Association Research Foundation. \$50,000. 12/17/17-05/31/19.

Systematic Review of Hand Drying Methods Research. 8% effort, PI. Excel Dryer, Inc. \$22,499. 8/18/2018-11/30/2018

Development and Dissemination of an Online Training for Environmental Health Professionals: Legionellosis Prevention and Response. 26% effort, Principal Investigator. Taren, Douglas (Co-PI). National Network of Public Health Institutes (NNPHI), and the Centers for Disease Control and Prevention (CDC). \$175,000. 12/1/2016-9/30/2018.

Modeling Virus Risks and Intervention Impacts in Healthcare Environments. 5% effort, Principal Investigator. Industry: GOJO Industries/Foundation: UA Foundation. \$19,000. 10/01/2017-2/28/2018.

Development of Office Wellness Programs. 5% effort, Principal Investigator. Industry: GOJO Industries/Foundation: UA Foundation. \$50,000. 12/30/2016-12/30/2017.

Water Quality Emerging Contaminants. 5% effort, Principal Investigator. Industry: Intergovernmental Agreement: Tucson Water. Development of Consumer Outreach and Risk Communication Tools. \$40,000. 07/2016-06/2017

Water Quality Monitoring using Smartphone Detection from Paper Microfluidics. 5% effort. Principal Investigator. Industry: Tucson Water; Foundation: National Science Foundation's Water, Environment and Technology Center. Renewed: \$23,582; 08/01/2016-07/31/2017.

Enteric Viruses as New Indicators of Human and Cattle Fecal Contamination of Irrigation Waters. 1% effort. Co-Investigator. Bright, Kelly (PI); Verhoughstraete, Marc (Co-PI). Multi-agency: Center for Produce Safety. \$219,879; 01/01/2015-06/30/2017

Identifying new surrogates for irrigation water. 2.5% effort, Co-Investigator. Verhougstraete, Marc (PI). Arizona Department of Agriculture. Specialty Crop Block Grant Program. \$65,441 10/21/2017-10/31/2018.

A New Way of Assaying Zika Virus through Monitoring Interfacial Effects on Paper. 5% effort, Co-Principal Investigator. Yoon, Jeong-Yeol (Co-PI). State: Pilot Interdisciplinary Project Grants. \$70,000. 7/1/2016-6/30/2017.

Controlled Laboratory Chamber Study of Antimicrobial Efficacy Over Long-Term Use. 3% effort, Principal Investigator. Foundation: Knowles Science Teaching Foundation; Industry: XStream, LLC. \$48,000. 2016-2017.

Impact of Spray Disinfectant on Spread of Viruses in an Urgent/Outpatient Care Facility. 8% effort, Principal Investigator. Industry: GOJO Industries. \$55,911. 2015-2017.

Impact of Antibacterial Soap on fecal bacterial load on humans and household fomites. 5% effort, Co-Principal Investigator; Gerba, Charles (co-PI). Industry: Safeguard Industries. \$80,000. 2016-2017.

Impact of Santa Clarita Water Softener Ban on Brine Discharge Regulatory Compliance. 8% effort, Principal Investigator. Foundation: Water Quality Association Research Foundation/ Pacific Water Quality Association. \$50,000. 2016-2017.

Healthcare Surfaces Summit. 20% effort, Co-Founder. Industry/Foundation: Healthcare Industry Manufacturer Sponsored (Kimberly-Clark, GOJO, NSF International, Copper Development Association). \$160,000. 2015-2017.

First Responder Safety and Health. 5% effort, Co-Investigator. Granillo, Alma (PI); Verhougstraete, Marc (Co-PI). State: Arizona Department of Health Services (ADHS), Hospital Preparedness Program (Ebola) and Public Health Emergency Preparedness Cooperative Agreements. \$240,000. 10/01/2015-09/30/2017.

Hand Sanitizer Laboratory and Field Efficacy Study. 1% effort. Principal Investigator. J&A Industries. \$9,692. 2015-2017.

Water Quality Monitoring using Smartphone Detection from Paper Microfluidics. 2% effort. Co-Principal Investigator; Yoon, Jeong-Yeol (co-PI). Industry: Tucson Water; Foundation: National Science Foundation's Water, Environment and Technology Center. \$18,821; 2015-2016

Optimal strategies for monitoring irrigation water quality and the development of guidelines for the irrigation of food crops. 1% effort. Co-Investigator. Verhougstraete, Marc (PI). Multi-agency: Center for Produce Safety. \$117,202; 2014-2016

Literature Review of Boil Water Notices in the U.S. 5% effort. Principal Investigator. Water Quality Association. \$15,000; 2014-2016

Determining Data Gaps in Risk Assessment for Produce Safety. 10% effort. Co-Investigator. Verhougstraete, Marc (PI). Arizona Department of Agriculture (ADA). \$50,306. 2015-2016.

Environment, Exposure Science and Risk Assessment Center (ESRAC) Continuing Support. 10% effort. Principal Investigator. Water, Environmental, and Energy Solutions (WEES) Initiative. \$51,940. 2015-2016.

An Exploration of the Cost Effectiveness of Hand Hygiene Programs in Preventing Hospital Acquired Infections. 5% effort. Co-Principal Investigator. Canales, Robert (Co-PI). Georgia Pacific. \$35,313; 12/15/2014-12/31/2016.

Spatial/Temporal Sampling of Irrigation Water. 5% effort. Co-Investigator. Bright, Kelly (PI); Verhougstraete, Marc (Co-PI). Arizona Department of Agriculture. \$73,680; 2014-2016

Molecular Epidemiology of *Clostridium difficile* Food Contamination: Links to Human Community Acquired Infections. 5% effort, Co-Investigator. Federal: USDA-AFRI; \$1,250,000; 2010-2016; PI of UA subcontract, \$250,000

Water Quality Monitoring using Smartphone Detection from Paper Microfluidics. 2% effort. Co-Principal Investigator; Yoon, Jeong-Yeol (co-PI). Industry: Tucson Water; Foundation: National Science Foundation's Water, Environment and Technology Center. \$32,000; 2014-2015

Chromium 6 Risk Characterization in Drinking Water. 5% effort. Principal Investigator. State: Tucson Water. \$17,500; 2014-2015

Hospital Field Study of T1 Air Disinfectant Recirculator Efficacy against Viral Tracers. 2% effort. Co-Principal Investigator. Verhougstraete, Marc (Co-PI). Industry: Aerobiotix, Inc. \$23,427; 2014

Comparison of Real-Time Methods for Monitoring *E. coli* in Drinking Water. 1% effort. Principal Investigator. State: Tucson Water. \$5,000; 2014

Quantitative Characterization of Microbial Malodor in Laundry. 12% effort, Principal Investigator. Industry: International Flavors and Fragrances, Inc. \$160,234; 2013-2015

Water Quality Monitoring using an Endetec Tecta-16 Analyzer. 1% effort, Principal Investigator. State: Tucson Water. \$7,400; 2013-2014

Bacterial Soft Surface Transmission Routes in Long-Term Care Facilities and Physician Offices. 7.5% effort, Principal Investigator. Industry: The Clorox Company. \$62,450; 2013-2014

Quantifying Bacterial Levels on Soft Surfaces in Healthcare Settings. 3.3% effort, Principal Investigator. Industry: The Clorox Company. \$48,232; 2012-2013

Virus Transmission in a Long-Term Care Facility. 12.5% effort, Principal Investigator. Industry: Kimberly Clark Corporation. \$60,580; 2012-2013

Development of Hybrid Courses in Risk Assessment. 5% effort. Principal Investigator. University of Arizona Online Education Project. \$10,000; 2012-2013

Tracking Microbial Transmission Routes in the Hotel Setting. 8% effort, Co-Principal Investigator; Gerba, Charles (co-PI). Industry: Kimberly Clark Corporation. \$74,627; 2011-2013

Development of an Environment, Exposure Science and Risk Assessment Center (ESRAC). 10% effort. Co-Principal Investigator; O'Rourke, Mary Kay (co-PI). Water, Environmental, and Energy Solutions (WEES) Initiative. \$250,000; 2012-2015

Hospital/Out-Patient Field Study of Disinfectant Efficacy against Microbes. 2% effort. Principal Investigator. Spectrashield Technologies, LLC. \$27,260; 2012-2013

Transfer and Control of Infectious Microbes in Emergency Vehicles. 2% effort. Principal Investigator. Northwest Fire District & The Clorox Company. \$29,170; 2012-2013

Risk Perception, Drinking Water Source and Quality in Low-Income Latino Communities along the US-Mexico Border. 1% effort, Co-Principal Investigator; Beamer, Paloma (co-PI). University of Arizona, Technology and Research Initiative Fund (TRIF) through the Water, Environmental and Energy Solutions Initiative. \$39,158; 2011-2013

Development and Validation of a Questionnaire to Assess Swimming Pool Water Exposures and Health Outcomes. 10% effort, Principal Investigator. National Swimming Pool Foundation. \$65,459; 2011-2012

Bioaerosol Hazards Associated with Qualitative Respirator Fit Testing. 1% effort, Principal Investigator. Federal: UCLA NIOSH Education Research Center. \$20,304; 2011-2012

Arts for Behavioral Change Program in Lima, Peru. 16% effort, Co-Investigator; Pleasant, Andrew (PI). Foundation/Industry: Canyon Ranch Institute/ The Clorox Company; \$728,000; PI of Microbial Assessment Team; UA subcontract, \$78,000. 2011-2012

Lab-On-a-Chip Flow Cytometer for the Detection of Enteroviruses. 5% effort, Principal Investigator. Foundation: UA Foundation Board of Trustees/Office of the Vice President for Research- Faculty Seed/ Community Connection Grant. \$9,835; 2011-2012

Evaluation of Disinfecting Wipes for the Interruption of Pathogen Surrogate Transfer in the Environment. 12% effort, Principal Investigator. Industry: The Clorox Company. \$37,989; 2011-2012

Evaluation of a Healthy Workplace Intervention. 8% effort, Co-Principal Investigator. Industry: Kimberly Clark Corporation. \$85,907; 2011-2012

Toxin Producing Cyanobacteria in Egypt's Suez Canal. 6% effort, Principal Investigator. Federal: U.S.-Egypt Joint Fund. \$60,000. 2007-11

The Occurrence of H1N1 and Seasonal Influenza virus on Household and Day Care Center Fomites. 10% effort, Principal Investigator. Industry: The Clorox Company. \$44,164; 2009-2011.

Indoor Mold Control on Porous Surfaces using Household Bleach. 13% effort, Principal Investigator. Industry: The Clorox Company. \$66,296; 2008-2010

Tracking MRSA in the Environment. 12% effort, Principal Investigator. Industry: The Clorox Company. \$120,000. 2005-09

Integrated Capture and Spectroscopic Detection of Viruses. 5% effort, Co-Principal Investigator; Riley, Mark (co-PI). State: Bio5 Institute. \$42,000; 2006-08

Point-of-Use Drinking Water Devices for Assessing Microbial Contamination in Finished Water and Distribution Systems. 6% effort, Principal Investigator. Federal/State: NSF/WQC. \$57,000; 2007-08

MRSA Prevalence and Exposure Potentials in Paramedic Environments. 15% effort, Principal Investigator. Industry: The Clorox Company. \$44,817; 2007-08

Monitoring Transmission Routes of MRSA in Gymnasiums. 15% effort, Principal Investigator, Industry: The Clorox Company. \$45,110; 2006-07

Evaluation of Point-of-Use Drinking Water Devices for Assessing the Extent of Microbial Contamination of Tap Water. 15% effort, Principal Investigator. Federal/State: NSF/WQC. \$73,000; 2006-07

Monitoring Methicillin-Resistant *Staphylococcus aureus* in the Domestic Environment Using Chromogenic Plating Medium. 15% effort, Principal Investigator. Industry: The Clorox Company. \$177,500; 2006

*This is a true and accurate statement of my activities and accomplishments. I understand that misrepresentation in securing promotion and tenure may lead to dismissal or suspension under ABOR Policy 6-201 J.1.b.*

Signed:

Kelly A. Reynolds

**Kelly Reynolds, Itemized List of Fees**

In office activities (consultation, document review, conference calls, literature searches, reports, etc.)	250/h*
Travel days- no activity	1500/day
Out of town activity days (face to face meetings, consultation, etc.)	2500/day
High-level activities (affadavits, deposition, trial activity, etc.)	500/h**

\*billed in 30 minute minimum increments

\*\*5 hour minimum

## Exhibit 2

**My testimony** in the past 4 years

Deposition. January 25, 2022. In re: CHILDREN’S DENTAL GROUP (In re Patient: Alejandrina Avila)  
Superior Court of the State of California – County of Orange – Complex Justice Center  
*Judicial Council Coordination Proceeding No. 4917*
